PROFESSIONAL SUMMARY

GIS professional with experience applying geospatial analysis and spatial data management to support county and municipal planning operations, including land development and subdivision review, zoning administration, and public-facing mapping applications. Skilled in ArcGIS Pro, ArcGIS Online, and ArcGIS Enterprise Portal, with a Master's degree in Geospatial Intelligence Analytics from Penn State. Experienced coordinating GIS data across departments and with state agencies, engineering firms, and outside consultants to support regional planning initiatives. Comfortable working independently to manage concurrent, deadline-driven projects, or as part of a team for large-scale collaborative projects.

CORE TECHNICAL SKILLS

ArcGIS Pro • ArcGIS Online • ArcGIS Enterprise Portal • ArcGIS Field Maps • ArcGIS Survey123 • ArcGIS Dashboards • Python Scripting • SQL • Microsoft Power Automate • Microsoft Office Suite (Word, Excel, PowerPoint, Teams)

PROFESSIONAL EXPERIENCE

GIS Analyst / Planner

January 2025 – Present

Schuylkill County — Pottsville, PA

Lead GIS analyst responsible for the County's spatial data stores, application development, and map production in support of multiple departments. Reviews subdivision and land development plan submissions from 50 municipalities and prepares official map documents for monthly Zoning Hearing Board meetings. Coordinates GIS data requests from interorganizational and third-party partners, collaborating with state and local agencies, engineering firms, and outside consultants on planning-related projects. Maintains the County's ArcGIS Enterprise organizational account.

- Supported development of a new county-wide Parks and Open Space Master Site Plan by using ArcGIS Field Maps to GPS-locate and inventory over 10,000 assets across the County's 67 municipalities.
- Balanced regulatory planning timelines as a Planner with urgent requests and long-term projects as a GIS analyst, strengthening time-management and project coordination skills.
- Improved data accuracy, accessibility, and processing time by transitioning the department from legacy paper processes to secure digital workflows, including websites, applications, and surveys.
- Authored training materials and visual guides to instruct staff on GIS platform use and present analysis findings to project stakeholders.
- Gained project management experience supervising a team of interns, including setting project goals, monitoring progress, and providing feedback and instruction.

Geographic Information Systems Temp

September 2023 – January 2025

South Whitehall Township — Allentown, PA

Maintained the organization's geographic database and spearheaded GIS-based projects to develop customer-facing products that streamlined public engagement and increased organizational efficiency. Supported organizational requests for information using data queries and spatial analysis.

- Created a suite of 8 GIS-based web applications that reduced department workload and increased interdepartmental communication and customer satisfaction.
- Led 3 department projects concurrently while meeting all deadlines, demonstrating flexibility and time-management under limited supervision.
- Increased organizational efficiency by integrating automation into department processes using ArcGIS and Microsoft Power Automate, streamlining operations with 35 easy-to-use digital applications.

Geographic Information Systems Intern

May 2023 – August 2023

South Whitehall Township — Allentown, PA

Assisted in the development, operation, and upkeep of a municipal government's geographic information system database, collecting data, digitizing maps, constructing layouts, and entering attribute information in support of 5 departments.

- Analyzed a collection of 480 paper plans, digitizing 51 maps and entering attribute information for over 15,000 organizational assets toward development of an organizational geodatabase.
- Instituted data management best practices, including georeferencing, domains, and topology, setting new standards of quality for Department of Environmental Protection plan submissions.
- Work was recognized with an offer to convert the seasonal role into a permanent position.

Online Task Contributor

August 2022 – April 2023

TELUS International — Remote

Supported the enhancement of AI and machine learning models by reviewing and analyzing text, image, audio, and video data from posts on social media platforms.

- Completed assigned tasks 20–30% faster than organizational quotas while maintaining excellent quality ratings.

EDUCATION

Master's Degree, Homeland Security — Intelligence and Geospatial Analysis Option

Pennsylvania State University, World Campus | GPA 4.0 | May 2024

Relevant coursework and certificates: Geographic Information Systems Postbaccalaureate Certificate; Geospatial Intelligence Analytics Graduate Certificate; Problem-Solving with GIS; Advanced Analytic Methods for Geospatial Intelligence; Intelligence Analysis, Cultural Geography, and Homeland Security.

Bachelor's Degree, Criminal Justice

Pennsylvania State University, World Campus | GPA 3.98 | May 2022

CERTIFICATIONS

GISP (GIS Professional) — In Progress. Actively working toward certification; eligible to apply upon completion of the required professional experience.

JOB-RELATED TRAINING

- Creating Python Scripts for ArcGIS — Esri Training, 11/2025
- Power Data-Driven Decisions with ArcGIS Dashboards — Esri Training, 07/2025
- Configuring an ArcGIS Online Organization — Esri Training, 06/2025
- Sharing Content to ArcGIS Enterprise — Esri Training, 02/2025
- Basics of JavaScript Web Apps — Esri Training, 09/2024
- Fundamentals of Project Management (PJMGT 5004) — Penn State Lehigh Valley, 06/2024
