Relevant Work Experience

GIS Analyst/ Planner

01/2025 – Present

Schuylkill County – Pottsville, PA

Lead GIS analyst in charge of the County's data stores, application development, data requests, and map creation. Performs analysis using advanced spatial querying and modeling to serve the GIS needs of multiple departments. Maintains the County's ArcGIS Enterprise organizational account. Receives and fulfills all incoming data sharing requests from interorganizational and third-party sources. Works collaboratively with many varied project partners including other local and state agencies, engineering firms, and outside consultants. Reviews and provides comment on subdivision and land development plan submissions from 50 municipalities in the County. Generates official map documents for monthly Zoning Hearing Board meetings.

Supported the development of a new county-wide Parks and Open Space Master Site Plan by creating and utilizing ArcGIS Field Maps to update legacy data through the fieldwork of GPS-locating and inventorying over 10,000 assets at parks across the County's 67 municipalities.

- Further developed time-management and project coordination skills by serving in a dual role that must adhere to regulatory timelines as a Planner while also handling urgent requests and long-term projects as a GIS analyst.
- Improved data accuracy, accessibility, and processing time by transitioning the department from legacy paper processes into more secure and efficient digital workflows through the creation of websites, applications, and surveys.
- Authored comprehensive training materials and visual guides in PowerPoint to instruct personnel on GIS platform utilization and present analysis findings to project stakeholders.
- Gained project management experience while acting in a supervisory role to a team of interns, including setting target project goals, monitoring progress, and providing constructive feedback and instruction.

Geographic Information Systems Temp

09/2023 – 01/2025

South Whitehall Township – Allentown, PA

Elevated to an expanded role that leverages skills to maintain the organization's geographic database and provide interdepartmental support for related tasks. Spearheads geographic information system-based projects to develop customer-facing products that streamline public engagement and increase organizational efficiency. Supports organizational requests for information using data queries and spatial analysis.

When tasked with increasing organizational efficiency, I created a suite of 8 geographic information system-based web applications that reduced department workload and saved employee time while increasing interdepartmental communication and customer satisfaction.

- **Demonstrated flexibility and time-management skills by successfully taking the lead on 3 department projects concurrently while meeting all deadlines.**
- **Increased organizational efficiency by integrating automation into organization processes using ArcGIS and Microsoft Power Automate.**
- **Streamlined operations by creating 35 easy-to-use digital applications.**
- **Used spatial analysis to solve problems and inform decision-making with data-driven results.**

Geographic Information Systems Intern**05/2023 – 08/2023****South Whitehall Township – Allentown, PA**

Worked semi-autonomously to assist in the development, operation, and upkeep of a municipal government's geographic information system database. Collected data, digitized maps, constructed layouts, and entered attribute information in simultaneous support of 5 departments.

I analyzed a collection of 480 paper plans, from which I digitized 51 maps and entered the attribute information of over 15,000 organization assets toward the development of an organizational geodatabase. The value of my work was acknowledged with an offer to make a seasonal appointment into a permanent position.

- **Demonstrated adaptability by quickly learning new organizational and software systems.**
- **Improved workload efficiency and accuracy by instituting best practices of data management such as through the use of georeferencing, domains, and topology.**
- **Fostered data-driven decision-making with the creation of 51 highly accurate digital maps.**
- **Set new standards of quality for Department of Environmental Protection plan submissions with the quality of maps that I created.**

Online Task Contributor**08/2022 – 04/2023**

TELUS International, Remote

Delivered exceptional support toward the enhancement of AI and machine learning models. Conducted reviews of social media pages to evaluate content. Performed data analysis of varying media formats, such as text, images, audio, video, and geospatial.

In this position, I helped to increase productivity by consistently completing assigned tasks in 20-30% less time than was expected by organizational quotas.

- **Increased production output and quality with efficient research of open-source intelligence.**
- **Facilitated decision-making processes by providing feedback on relevance and accuracy of AI responses.**

Education**Master's Degree, Homeland Security – Intelligence and Geospatial Analysis Option**

Pennsylvania State University, World Campus, GPA 4.0, 05/2024

- **Relevant Coursework, Licenses, and Certifications:** *Geographic Information Systems Postbaccalaureate Certificate; Geospatial Intelligence Analytics Graduate Certificate; GEOG 483 Problem-Solving with GIS; GEOG 885 Advanced Analytic Methods for Geospatial Intelligence; GEOG 571 Intelligence Analysis, Cultural Geography, and Homeland Security*

Bachelor's Degree, Criminal Justice

Pennsylvania State University, World Campus, GPA 3.98, 05/2022

- **Relevant Coursework, Licenses, and Certifications:** *CRIMJ 260 Statistical Analysis for the Social Sciences; CRIMJ 250W Research Methods; CAS 100C Effective Speech; ENGL 202A Writing in the Social Sciences; CRIMJ 465 Ethics in Criminal Justice*

Job-Related Training**Esri Training**
